

Berry Breast Cartilage Harvest System Model: B-BCHS2-30

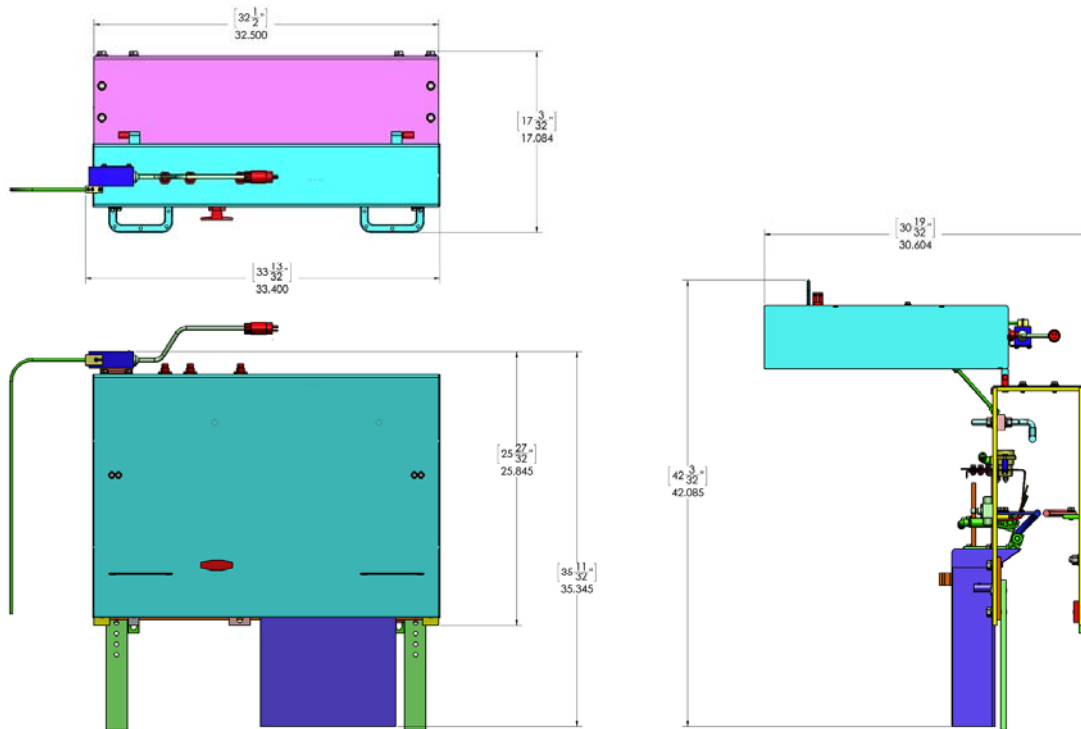

Patent Number: US 6283847 B1

Berry BCHS2-30

The **Berry Plumbing & Equipment Model B-BCHS2-30** is fed by a Cone Deboning line and powered by 110 volts. It is designed to cleanly and efficiently remove the cartilage from the carcass. This machine will handle the same capacity as your Cone Deboning line.

Berry BCHS-LH/RH

AIR:	90 PSI
ELECTRICITY:	110V
CAPACITY:	DEPENDANT ON LENGTH OF DEBONING LINE
POSITION IN LINE:	LAST ON DEBONING LINE
FACING:	DETERMINED BY HAND OF DEBONING LINE
HEIGHT:	DETERMINED BY CONE SHAFT LENGTH
WIDTH:	APPOX 17"
DEPTH:	APPROX 32.5" OVERALL

Berry BCHS-LH/RH

Construction:

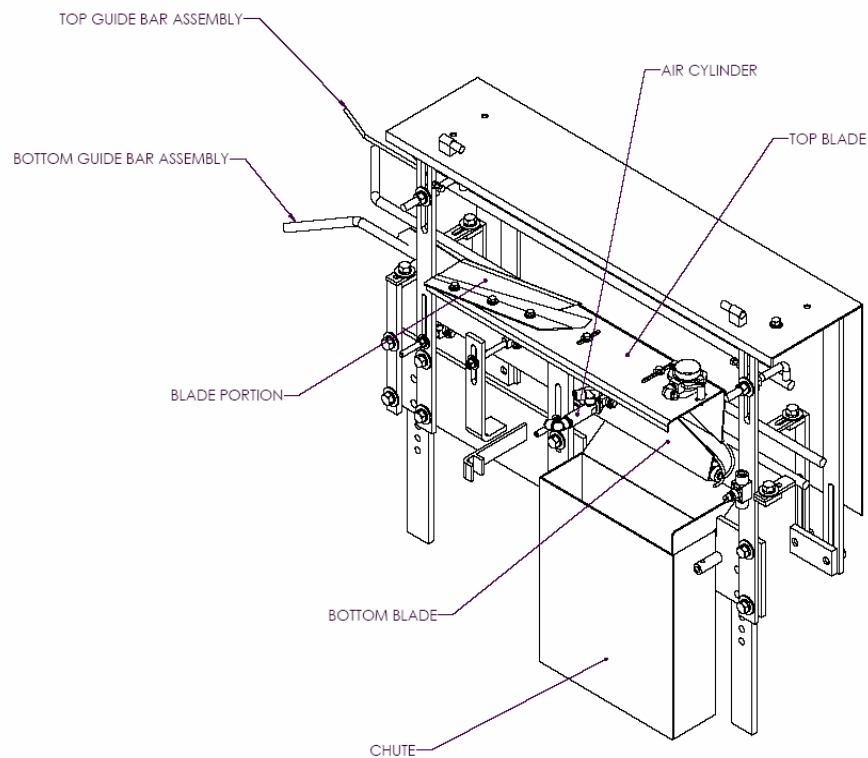

The **Berry B-BCHS LH/RH** is designed for maximum safety and ease of operation. The machine is constructed entirely of stainless steel and uhmw for durability and easy cleanup.

Operation:

Installed at the end of the Cone Deboning line, with proper adjustment of its unique combination of guide bars and stationary blades, the Berry Breast Cartilage Harvest System cleanly and efficiently separates the cartilage from the carcass. Automatically matches the speed and capacity of the Cone Line.

Maintenance:

Almost maintenance free except for keeping the blades sharpened and guide bars adjusted for optimum performance. Requires daily regular cleaning.

The specifications as stated herein are the most current at the time of publication. However, consistent with our standard of continual product development, we reserve the right to change the design without notice or obligation to modify any equipment previously sold or delivered.
