

Berry Cut-Up Saw - OCS-9

Model B-OCS-9

Berry's unique **Model B-OCS-9 Cut-Up Saw** is specifically designed for maximum safety. When staffed by an efficient staff, the B-OCS-9 provides quality yield of premium poultry parts.

INSTALLED POWER:	1 HP Stainless Steel Motor, Single Phase
CAPACITY:	3 to 4 Birds Per Minute (depending on operator)
HEIGHT:	Approx. 58" Unit has 12" Adjustable Legs
WIDTH:	Approx. 19"
LENGTH:	Approx. 19"

Construction:

The Model B-OCS-9 Cut-Up Saw from Berry Plumbing & Equipment is manufactured entirely of stainless steel for rust resistance and easy cleanup.

Operation:

The guide rod beneath the blade helps the operator to position the pieces for cutting. The blade cover remains stationary as it rests upon the angle frame around the blade. The blade guard, covering only the lower part of the blade, is pushed up by the meat being cut, exposing the minimum amount of blade necessary for operation. The Berry Model B-OCS-9-2 Cut-Up Saw is uniquely designed for maximum safety and ease of operation.

Unique Feature:

Part # BPE-1805 / Lower Blade Cover

The lower cover for the blade features a **slotted** cover which provides a lighter weight for easier lifting and faster cuts, also allowing a visual view of the cutting process.

Maintenance:

Smooth rounded surfaces and easily removable covers make thorough clean up easy for the cleaning personnel. The circular blade should be kept sharpened.

Options:

The Cut-Up Saw is available with a bagger attachment for efficient packing of parts, Model B-OCS-9-B. It is also available as the stand model shown at right **B-OCS-9-S** or as the table model **B-OCS-9-T** (shown on front).

The specifications as stated herein are the most current at the time of publication. However, consistent with our standard of continual product development, we reserve the right to change the design without notice or obligation to modify any equipment previously sold or delivered. 12/31/2000
