

Berry Foot Picker 3

Model B-FP-3

Model **B-FP-3 Foot Picker** from Berry Plumbing & Equipment Company, the perfect compliment to your Berry Paw Harvesting System, gently removes any remaining cuticle from the paw without damaging the product.

Berry Foot Picker 3

Construction:

The frame and cabinet of the Berry Plumbing & Equipment **Foot Picker Model B-FP-3** is constructed entirely of stainless steel for durability and easy cleanup. Picking fingers are made of rubber.

Operation:

Paws are deposited into the **Model B-FP-3 Foot Picker** from the **Paw Harvester**. Here they are gently cleaned as they traverse a system of fixed and rotating fingers and pressurized water which remove all remaining cuticle from the paws. Waste falls from the **B-FP-3 Foot Picker** through the perforated basin into a catch pan under the picker. Paws emerge thoroughly cleaned with very little damage to the product.

Maintenance:

Berry Plumbing & Equipment Company designers and technicians have taken great care in assuring that the **Model B-FP-3 Foot Picker** is manufactured with smooth rounded surfaces and easily removable covers to make thorough clean up easy for cleaning personnel. Maintenance required is cleaning, regular greasing of bearings and chains and checking for worn fingers.
