

Model B-FBCC

Berry Plumbing & Equipment's uniquely engineered and patented **Full Box Compression Conveyor** reduces uneven and lopsided boxes by gently shaking the box so that the product is more evenly distributed and then compressing the lid. This makes lifting and stacking easier and more efficient.

INSTALLED POWER:	Hydraulic
CAPACITY:	Up to 60 boxes per minute
HEIGHT:	51"
WIDTH:	26 1/2"
LENGTH:	120"

Construction:

The **Berry Model B-FBCC Full Box Compression Conveyor** is manufactured entirely of stainless steel and U.H.M.W. polymer with plastic belting.

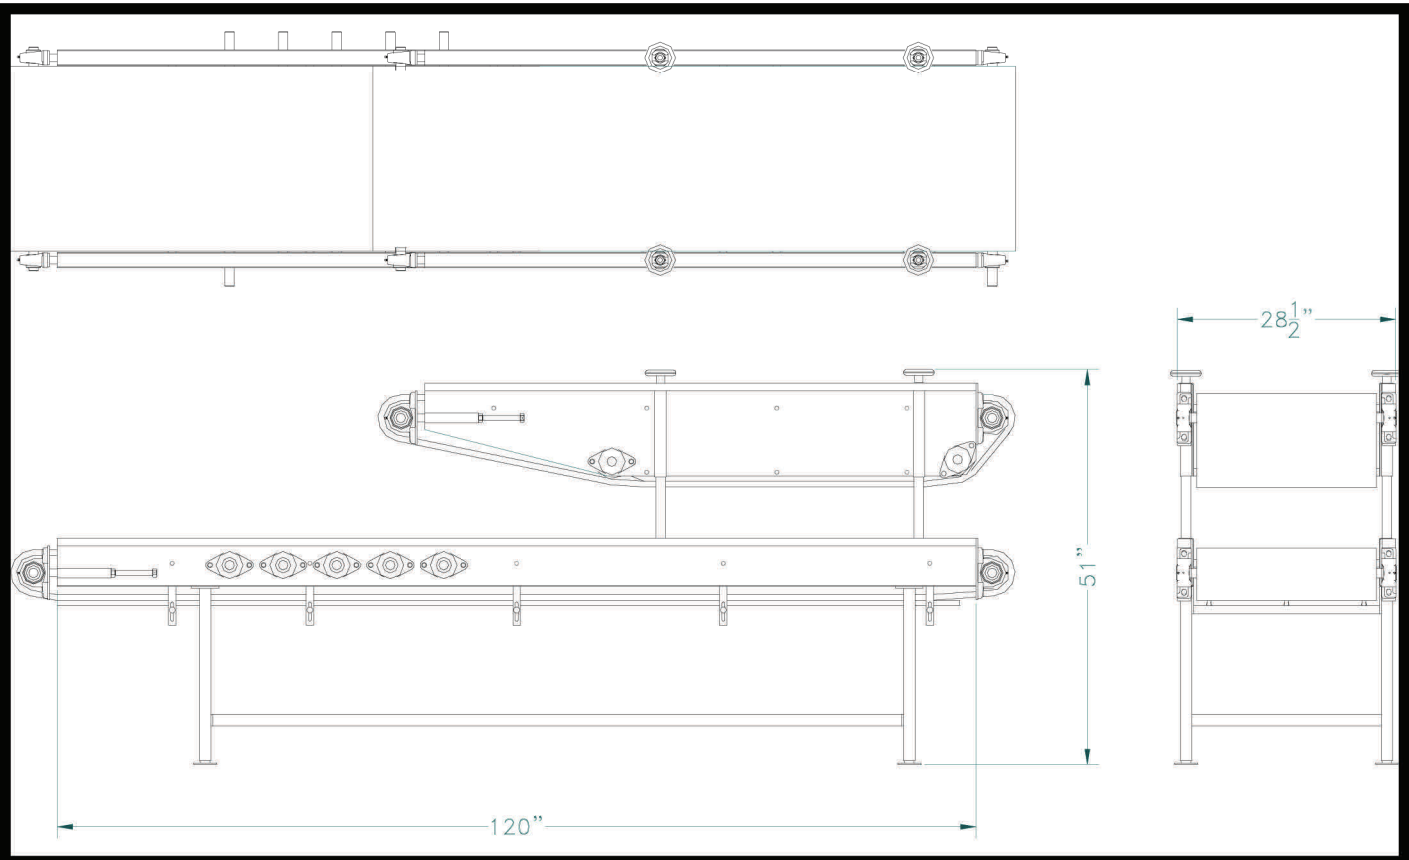

resulting in a more level lid and making the boxes easier to lift and stack.

Maintenance:

Great care has been given to the design of the **Model B-FBCC Full Box Compression Conveyor** to assure minimum maintenance and smooth rounded surfaces. This makes thorough clean up easy for the cleaning personnel. Regular lubrication of bearings is practically all the servicing required.

Operation:

Full boxes with lids are loaded onto the lower conveyor where the box is shaken so that the product inside is distributed more evenly. Then the lid is gradually compressed by the upper conveyor,

The specifications as stated herein are the most current at the time of publication. However, consistent with our standard of continual product development, we reserve the right to change the design without notice or obligation to modify any equipment previously sold or delivered.
