Berry BSDS-60-1

Construction:

The **Berry BSDS-60-1** is designed for maximum safety and ease of operation. The machine is constructed entirely of stainless steel and uhmw for durability and easy cleanup.

Operation:

The **Berry BSDS-60-1** is a gear driven rotary screen built of stainless steel construction that is capable of removing up to 60 GPM of water from the skin & fat matter coming from the cone lines.

Maintenance:

With proper operation, the only other maintenance the **Berry BSDS-60-1** requires is daily cleaning and checking of various parts such as the bearings, gears and rollers for wear and fractures. Also check oil in gearbox.

The specifications as stated herein are the most current at the time of publication. However, consistent with our standard of continual product development, we reserve the right to change the design without notice or obligation to modify any equipment previously sold or delivered.
