

## **Model B-PH-HDE**

**US Patent # 6283848 B1**

Automatically fed, electronically powered and belt driven; the Electric Paw Harvester is designed to remove the paws of all size birds lots. The Model **B-PH-RH/LH-E Paw Harvester** from Berry Plumbing & Equipment will handle any line speed and provide a significant increase in yield.

**Construction:**

The Berry Plumbing & Equipment **Paw Harvester Model B-PH-RH/LH-E** is constructed entirely of stainless steel and UHMW for durability and easy cleanup.

**Operation:**

**The Model B-PH-RH/LH-E** matches the speed of your Overhead Conveyor. Installed at the end of the Kill Line, the **Paw Harvester** features brushes that gently clean the foot while perfectly positioning it in the shackle for a consistently straight cut at whatever length you require. The **Paw Harvester** blade then cleanly cuts and separates the paw from the knuckle, allowing for easy processing of any size paws.

**Yield:**

The Berry **Model B-PH-RH/LH-E** demonstrated a *significant increase* in yield when compared in tests to our competitors.

**Maintenance:**

With proper operation, regular cleaning and lubrication of bearings, the only other maintenance the **Model B-PH-RH/LH-E Paw Harvester** requires is an occasional sharpening of the Paw Harvester blade.

**Options:**

Berry Plumbing & Equipment offers a **Hydraulic Power Unit** for operation of the **B-PH-RH/LH**. Also the **Berry Paw Harvester with Reject Chute and Air Control Box** is available for the option of whole paw harvesting.
